

SELA
The International Private School

THE SCHOOL OF THE FUTURE

Our Vision

SELA is dedicated to molding students into visionary leaders with a global perspective, ready to tackle and resolve complex issues on a worldwide scale. SELA provides this through specialized language, academic and learning experiences.

Who We Are

Established in 2004, SELA embarked on a mission to transform education in response to the evolving needs of today's society. SELA is committed to providing a top-quality, immersive academic program tailored for English-speaking children aged between 3 months and 6th grade. Our campuses are strategically situated in two convenient South Shore locations, Hingham-Norwell.

SELA's Unique Model

In small classrooms led by teachers who serve as facilitators, students are empowered to embrace their independence and chart their unique learning journeys. Educators with expertise in specific subjects provide guidance that nurtures students' exploration of their creativity and growth in confidence. Through full language immersion and a rigorous academic curriculum, the ultimate goal is to cultivate a lasting passion for lifelong learning.

Measures of Success

Our school strongly emphasizes student learning beyond standardized tests, rather we use the TerraNova and LAS assessments to evaluate school performance and improve academic development among students. The results of these assessments are used internally, and parents can have access to the results.

In the Terra Nova assessment, SELA Elementary students have achieved scores that surpass the national average in 100% of English, Social Studies, and Science subjects and 93% of Mathematics across all grade levels. Moreover, students consistently graduate at least two grade levels ahead in all academic areas.
